

MGB/C Cup Holder Information

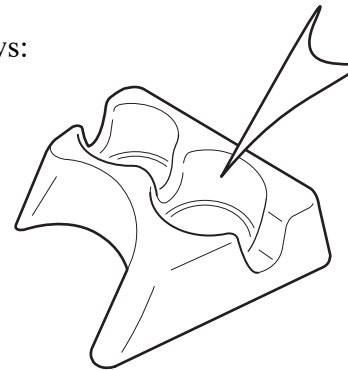

1. This custom Cup Holder fits all MGB's and MGC's that came with the factory center console (1972-1980). Simply set the cup holder in place in front of the shifter and use. No screws, velcro or adhesive needed!
2. The left side of the holder will fit a 12oz can, as well as most fast-food cups. The right side of the holder will fit larger cups as well as some mugs. We recommend you purchase the Premium Can Insulator with British Logos (illustrated) that is slimmer than standard insulators and fits the right side of this Cup Holder very nicely. These are made of high quality wet-suit material (neoprene), and will keep your soda cold better than thicker ones. Fit bottles, too. They come in Red, Blue, or Green for about \$6 each.
3. Note that for 1976-1980 MGB's, the power outlet (cigar lighter) is located close to the forward edge of this cup holder. If you have a large telephone/GPS/etc. plug that interferes with the cup holder, we recommend you buy the Bell extension cord (about \$4 at WalMart; product #39003-8).

This cord will not interfere with the cup holder if you modify it as follows:

- A. Wrap a sturdy rubber band around the body.
- B. Remove the silver end cap.
- C. Saw or clip off the plastic that was under the end cap.
